In a letter to John Jay, Jefferson thu describes the Prince of Wales, afterwards

George IV: He has not a single element of math matics, of natural or moral philosophy, or of any other science on earth, nor has the society he has kept been such as to supply the void of education. It has been that of the lowest, the most illiterate and profligate person in the kingdom without choice of rank or mind, and with whom the subjects of conversation are only horses, drinking matches bawdy-houses, and in terms the most vulgar. The young nobility who begin associating with him soon leave him, disgusted by the insupportable profligacy of his society; and Mr. Fox, who has been supposed his favorite, and not a Mississippi aligator, having asked a over-nice in the choice of company, good many of the most distinguished of would never keep his company habitually.
